## Pacific Pride's ExteriorDoor Products

With more than 75 cumulative years of experience building, designing, and engineering wood doors, Pacific Pride Building Products knows wood doors! The insistence of exact tolerances, the moisture level of all wood components, and the hand selection of each piece of wood that go into our wood doors ensure the absolute best quality and outstanding value in the marketplace today.

We take great pride in providing our customers with the best designs at best possible value. All our doors are prefinished with a 9 step oil-based polyurethane process at the factory, allowing us to finish all edges of the panels before the assembly of the doors. This process is extremely important for the long life of the doors and minimizing any panel issues.

Your front door makes a statement. So it's important to choose one that's not only beautiful but reflects your style as well. Pacific Pride brings you the perfect balance of style, quality, and value with hardwood Premium, Builders, and Cottage series doors that both elevate and enhance any facade. Choose Pacific Pride for a smart investment that will fit your needs, your home, and your life.

## Ensuring Quality Through Rigorous Testing

DP is a performance specification for how strong a door is, expressed in how many pounds per square foot (psf) of pressure it can withstand. This specification can fluctuate based on several factors, such as geographic location, the height of the building, the location of the door in relation to the building, etc. All of these factors are used to calculate what the Design Pressure (DP) is for a specific door.

During testing, a door is attached to a wooden frame and clamped to a specially designed wall. Air pressure is gradually reduced on the inside of the door, which increases the pressure on the outside until the door fails (breaks beyond repair). The test pressure must reach 1.5 times the design pressure for 10 seconds without the door suffering permanent damage. In other words, a door with a Class / DP of 30 would have to withstand 45 psf.

The instant the door fails, the psf is recorded and is used for the calculation. Laboratories will then issue labels that indicate the DP for the door – labels used by the Window and Door Manufacturers Association (WDMA), the American Architectural Manufacturers Association (AAMA), and other organizations.

CLASS/DESIGN PRESSURE IN PSI (INCHES OF WATER)	CLASS/DESIGN PRESSURE EQUIVALENT WIND VELOCITY IN MPH	STRUCTURAL TEST PRESSURE EQUIVALENT WIND VELOCITY IN MPH
15 (2.88)	77.52	94.94
20 (3.84)	89.51	109.63
25 (4.80)	100.08	122.57
30 (5.76)	109.63	134.27
35 (6.72)	118.42	145.03
40 (7.68)	126.59	155.04
45 (8.64)	134.27	164.45
50 (9.60)	141.53	173.34
55 (10.56)	148.44	181.8
See your local county building planner to see what DP rating is best for your area. Pacific Pride will not provide regional information for DP ratings.		

## Pacific Pride Builders Series Door Features

- TDI Rated / DP 50
- These doors have been tested and approved to meet a Design Pressure (DP) rating of 50. In order to qualify for a DP 50 rating, the door or window is subjected to extreme testing conditions that simulate hurricane force winds up to 173 mph.
- Available in both 4-9/16" and 6-9/16" Jambs (2" Extension kit)
- Oil rubbed bronze ball bearing hinges provide years of easy swing
- Adjustable Composite Bronze Sill
- 2-3/8" backset
- Composite Jambs
- High-performance compression weather-stripping resists rot and corrosion while sealing out the weather elements

## A Pacific Pride Cottage Series Door Features:

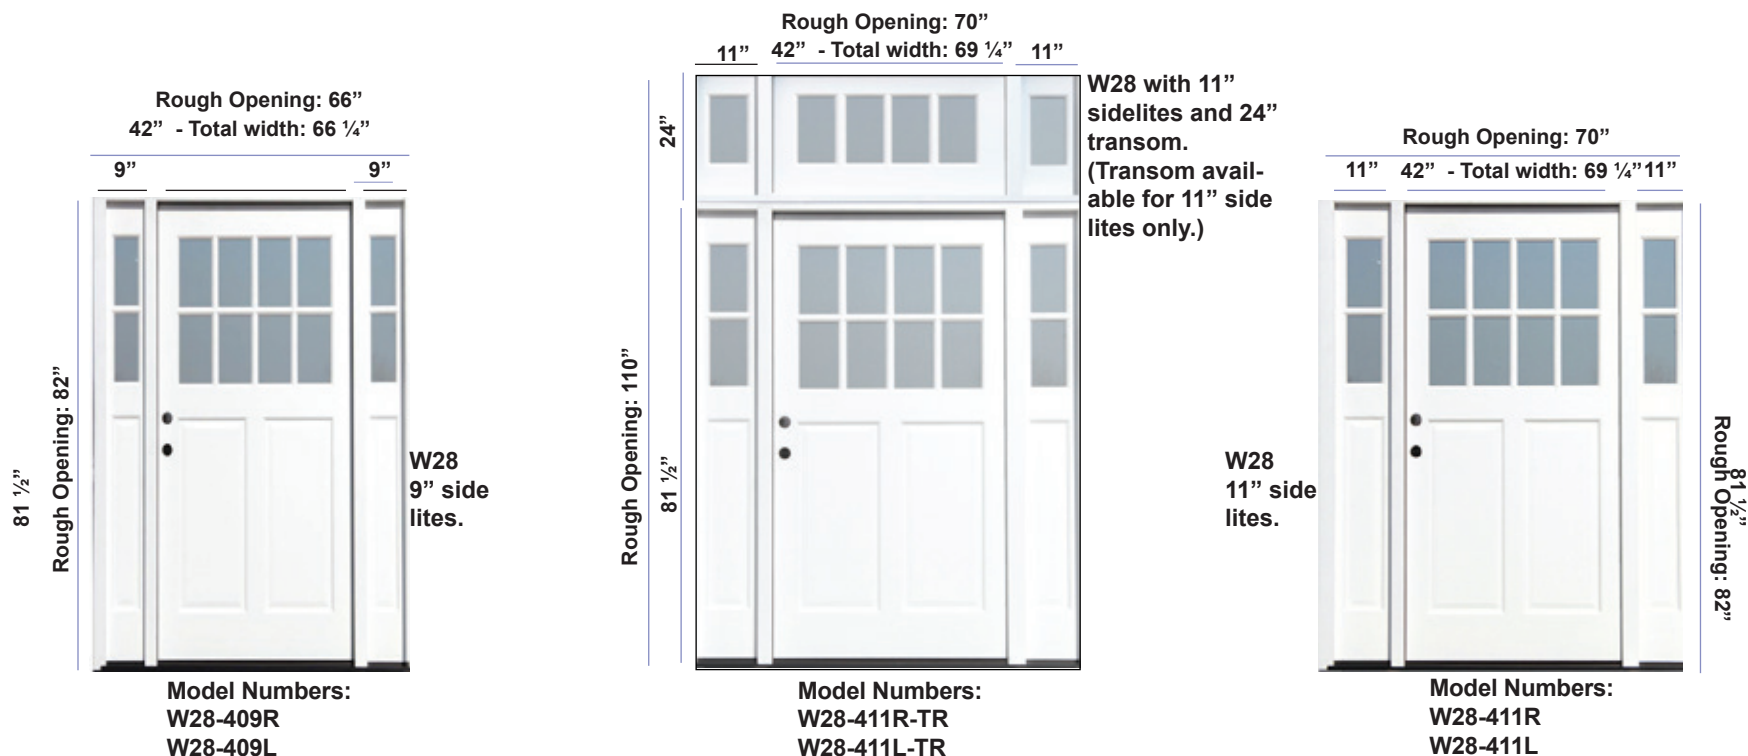

- TDI Rated / DP 50
- These doors have been tested and approved to meet a Design Pressure (DP) rating of 50. In order to qualify for a DP 50 rating, the door or window is subjected to extreme testing conditions that simulate hurricane force winds up to 173 mph.
- Our Cottage Series Models Comes in Prefinished White and Features the 4Ever Frame Composite Jamb System and Composite Brick Mould

### Frame Features:

- Closed cellular structure
- Rigid poly-fiber formulation
- 2X screw holding power
- No aluminum support channels needed
- Will not absorb moisture
- Stronger than wood door frames

# Introducing our new Cottage Wide Body Series Exterior Door

For those who like the room to walk through their entrance, the widebody gives you a wide door that fits in standard openings. Great for moving in furniture or allowing plenty of room for a wheelchair.

## Premium Series

EM55 - 5 Lite Mistlite Mahogany Door with the  
EM60MSMT Site Lites (Shown above with espresso finish)

### A Pacific Pride Premium Door Features:

- Factory pre-hung/pre-finished (with oil base polyurethane)
- Matching 4-5/8" ext. jambs
- Weatherstrip
- 4" ball bearing hinges
- Adjustable sill
- 2-3/8" backset
- 5-1/2" DB on center
- Optional 6-9/16" extension kit and dentil shelves

## Standard Features

Engineered to maintain both their appearance and integrity, Pacific Pride doors provide the complete exterior entry solution. All configurations come pre-hung in a system that ensures unit integrity, ease of installation and happy homeowners. With four distinct lines - Craftsman, Contemporary, Traditional and Rustic - customers are sure to find a door to fit their style.

## Interior Door Products

The important word in our name, Pacific Pride Doors, is the word **PRIDE**. We take pride in our workmanship, pride in bringing beauty into your home, and great pride in the quality and value we offer in our door line. Our customers realize these virtues in our product and that is why they chose Pacific Pride Doors.

*“They’re beautiful. The minute these doors arrived, we loved their velvety goodness, and not just because they look remarkably better than our old doors.....they look and feel solid, timeless, and crafted with care”.*

Pacific Pride employees represent over 75 years of experience in building, designing and engineering wood doors to exacting tolerances. Always setting trends in design and use, Pacific Pride continues to innovate. Constantly striving to make things easier for customers and giving complete solutions is our goal.

Our interior swinging doors offer complete reversibility. You no longer need to know which way or “hand” a door swings, as our new patented reversible jamb/door system allows the swing to be determined or even changed on the job site. If that light switch ends up behind the door, **REVERSE** the swing with our new system! Having the correct swing door every time saves both time and money. Another huge benefit is how easy it is to transport and handle our doors. We have greatly reduced the chance of damage to the doors and your physical self.

Our new interior line features a full line of barn door products including Rustic, Traditional and clean Contemporary designs.

Whether it be a Knotty Alder, Mahogany, White Prefinished/Primed, or architectural designs, Pacific Pride has a solution for your home that you can take great **PRIDE** in for your family.

Thank you for letting us into your homes and being a part of your future memories.

## Redesign Your Home with Pacific Pride!

When renovating her Chicago home, Michelle Renard, author of popular home decor and interior design blog *Hello Lovely*, selected our Knotty Alder interior doors to install throughout the house.

Michelle paired the rustic look of our Knotty Alder doors with white and gray finishes, accents of tan burlap, and pastel accessories to complete the look. The results are stunning!

# Reversible Jam System PATENTED

Pacific Pride doors introduces a patented, revolutionary design with the **Patented** Reversible Jamb System. Created so that handing does not have to be determined until installation, the Reversible Jamb System benefits every step of the supply chain; from distributors and retailers who can reduce inventory without sacrificing selection, to installers and DIY customers who can ensure job completion through flexible reversible handing.

## HINGE PREP

Machined both sides so that hinge jamps can be switched with strike jamps to reverse handing.

## HINGES

Engineered with one radius flange and one square edge flange so hinges can be flipped to accommodate either handing.

## JAMB STOPS

Jamb stops are shipped loose so they can be applied after installing frame for a cleaner, stronger system.

## STRIKE PREP

Machined both sides so that strike jamps can be switched with hinge jamps to reverse handing.

# The Pacific Pride Reversible Jamb Kit PATENTED

- No more handing “oops”  
Never worry about LH or RH mistakes again
- A stronger, cleaner system  
Installing frame through the jamb stop channel allows for installation adjustments and no nail or screw holes to repair or putty
- Less damage  
Reducing inventory means less space required, less handling needed and ultimately less damage caused

## Barn Door in a Box

### Complete Barn Door Kit Ready to Assemble

Exclusive to Pacific Pride! Everything is in one box!

UP2100  
Radiata  
Pine  
Unfinished

Outside Vertical Planks: 6"  
Inside Vertical Planks: 4"  
Thickness: 1 3/8"

UA3100  
Alder  
Unfinished

All Vertical Planks: 6"  
Thickness: 1 3/4"

Pacific Pride's unique Barn Door in a Box is extremely versatile. By assembling the Barn Door in a Box yourself, you determine the orientation of the knots. That means each customer gets to be the artist in creating their own one of a kind, custom barn door. If you have a shorter door opening or a custom application, you can cut each plank down in height to fit that application. The possibilities with this door are endless!

## Possible Pine Configurations

## Possible Alder Configurations

### Features:

- Unfinished Radiata Pine or Alder
- Stain or paint to match your decor
- Pre-drilled holes and prepped for ease of door assembly and hardware installation
- Doors and hardware designed to ensure smooth fit and function
- 1 3/4\" and 1 3/8\" thicknesses(see individual unit specifications)

Oil Rubbed Bronze hardware

## White Primed Doors

Pacific Pride Doors are beautiful, functional, and add a unique flair to your home. You can purchase a single barn door to add style to a room, or purchase two of the same door to create a bi-parting or bypass setup in your space.

Our White Primed doors come ready to paint making it easy to match the decor of any room. Every Rustic Alder door can be ordered unfinished, allowing customers the opportunity to apply a stain that best suits their home. Our barn doors can be coordinated with our swinging interior doors throughout your home to add a dramatic focal point.

Pacific Pride has many options to ensure that choosing the right door is simple and satisfying.

Using our easy two step process, we can help you select the perfect solution to all your door needs.

## Select a Design

## Select Your Hardware

At Pacific Pride, we like choices. That's why we offer two different styles of hardware for our stunning barn doors. Customers can choose between our oil rubbed bronze flat track or stainless steel flat track to fit their exact door needs.

All our standard tracks are 80 inches long drilled on 16 inch centers. Each track is offered in multiple sizes, allowing you to choose the track that best fits your room opening.

**BDH01**  
**Bronze**

Lengths: 48" 64" 80" 84"

**BDH02**  
**Satin Nickel**

Lengths: 48" 64" 80" 84"

# Bi-parting Barn Doors

A beautiful way to enhance your dining, study, kitchen or bedroom areas, bi-part barn doors provide an elegant transition between spaces. All of our single barn doors can be purchased as a set of bi-part doors and are built for long lasting beauty and durability.

Both our stainless steel and oil rubbed bronze flat track hardware sets are available for double door installation. Add the Track Connector option to connect two tracks when longer travel is needed. Multiple handle choices are available in addition to the Soft Closer option to create a one of a kind set up.

## Bypass Barn Doors

Bypass double door hardware allows the ability to dress up closets with the beauty of barn doors. Hardware adapts to both 1 $\frac{3}{8}$  in. or 1 $\frac{3}{4}$  in. thickness doors and has a quality oil rubbed bronze powder or stainless steel coat finish. With easy to follow installation instructions, mounting is quick and easy to add class to any closet.
